

Deploy the App in IBM Cloud

Date	03 November 2022
Team ID	PNT2022TMID17806
Project Name	Smart Fashion Recommender Application

Command Prompt

C:\Users\Rohith>docker --version
Docker version 20.10.17, build 100c701

C:\Users\Rohith>docker-compose --version
Docker Compose version v2.10.2

C:\Users\Rohith>docker run hello-world

Hello from Docker!
This message shows that your installation appears to be working correctly.

To generate this message, Docker took the following steps:
1. The Docker client contacted the Docker daemon.
2. The Docker daemon pulled the "hello-world" image from the Docker Hub. (amd64)
3. The Docker daemon created a new container from that image which runs the executable that produces the output you are currently reading.
4. The Docker daemon streamed that output to the Docker client, which sent it to your terminal.

To try something more ambitious, you can run an Ubuntu container with:
\$ docker run -it ubuntu bash

Share images, automate workflows, and more with a free Docker ID:
<https://hub.docker.com/>

For more examples and ideas, visit:
<https://docs.docker.com/get-started/>

C:\Users\Rohith>docker run -d -p 80:80 --name webserver nginx
docker: Error response from daemon: Conflict. The container name "/webserver" is already in use by container "e34860821f0bbf022aeb44d1c7072a676df86ce8fab5ebbb87e0af1885066295". You have to remove (or rename) that container to be able to reuse that name.
See 'docker run --help'.

Docker Desktop

Containers [Give Feedback](#)

A container packages up code and its dependencies so the application runs quickly and reliably from one computing environment to another. [Learn more](#)
